United International University
School of Science and Engineering
Final Examination Trimester- Spring 2022
Course: MATH -1151
Total marks - 40; Duration – 2 hours
Answer all the questions

1. (i) Given that $\frac{dy}{dx} = \sqrt{8x+1}$. Express y in terms of x.

(ii) Evaluate $\int_{-3}^{0} |x+4|\,dx$ by sketching the bounded region. [8]

2.

A particle moves in a straight line so that t seconds after passing through a fixed-point O, its velocity v m/s, is given by $v = (t+1)\sqrt{t}$. Find

(i) The initial velocity of the particle.
(ii) The acceleration of the particle at $t = 4$.
(iii) The distance s travelled by the particle in the first 6 seconds by integrating v. [1+3+4 = 8]

3.

(a) Differentiate the followings with respect x:

(i) $y = e^{2x}\,sin(3x+1)$

(ii) $y = ln\sqrt[3]{1+4x^2-x^4}$

(b) Evaluate the followings:

(i) $\int \frac{(2x+1)^2}{\sqrt{x}}\,dx$

(ii) $\int (x^2-1)\,cos3x\,dx$ [4+4=8]

4.

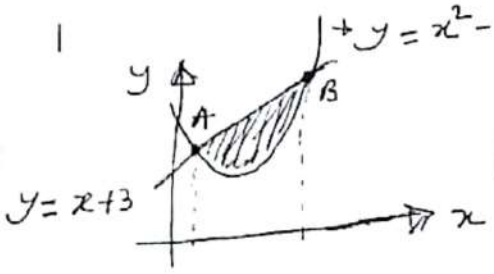
(i) Evaluate $\int_1^2 x^2 \ln x\,dx$

(ii) By using appropriate substitution evaluate $\int_0^{\frac{\pi}{4}} cosx\sqrt{sinx+3}\,dx$ [4+4=8]

5.

(i) Sketch the graph of $y = x^2$ and $y = 2x$ and then find the area enclosed or bounded by the curves.

(ii) The figure shows the graph of the curve $y = x^2 - 3x + 6$ and the line $y = x + 3$.



(a) Find the x-coordinate of A and B
(b) The area of the shaded region [4+4= 8]
